Great Basin Incident Commander Conference Call Agenda 2015	
	877-779-1564/564507#
Date: 9/12	Note taker: G. Dingman
GB MAC/GACC Coordinator: Agenda/Incident Commander Discussion Points: <u>Summarize the following in 4 min or less:</u> <ul style="list-style-type: none"> • Fire Size / % contained / # of people / Cost to date • Significant changes since the last 209 • BRIEF fire synopsis /Critical Incident Information (use Directional vs DIVS's) • Political Issues / Community Meetings • Closures / Evacuations / Public Safety Issues • Major Safety Concerns / Injuries / Accidents • Critical Resource Needs • Resources Available to Reassign/Share/Demob 	
Predictive Services:	<p>Much Above Normal Warmth/Dryness through Saturday...</p> <p>...Isolated Lightning Western NV and Sierra Front Sunday...Followed by Increasing Winds Monday...</p> <p>...Much Cooler with Significant Precipitation Possible by Next Week...</p> <p>High pressure centered across the Great Basin will maintain much above normal temperatures for all areas today and Saturday, with record heat possible across much of Nevada. Afternoon RH will drop into the single digits across NV and 10-15% into ID/UT/WY, with overnight RH recovery increasingly poor as drier air moves into the region.</p> <p>Computer models suggest that mid level moisture will make its way into western/northwest Nevada, the Sierra Front and possibly into southern Idaho beginning Sunday, bringing the potential for isolated thunderstorm activity. Lightning, even with rain, can cause an increase in initial attack due to the warmth/dryness of the past few days. Deeper moisture will likely move into southern NV on Sunday night into Monday and spread into eastern NV and the southern half of UT by Monday. Before lower humidity fully arrives at the surface, there is the potential for a period of gusty winds ahead of a strong low pressure system early next week. This storm has the potential to bring significant precipitation for much of the Great Basin.</p>
GBCC Update:	<p>3 fires / 308 acres -</p> <ul style="list-style-type: none"> • GBCC will be staging some resources across the Basin in anticipation for the hot, dry weekend weather. •
1 Fire: Teepee Springs IC: Chris Wilcox / Brook Chadwick (T)	<p>95082 / 77% of objectives / 751 people / 18.4M</p> <ul style="list-style-type: none"> • Wilcox's IMT took over the fire at 0600 today. • NE corner very active. Preparing for indirect line for today thru the weekend. • North side of the river – continue to mop up

Appendix 7

	<ul style="list-style-type: none"> • Rehab continues on the South and West side • Day 7 of hot, dry weather. Now expecting high winds, the fire is ready to move on the NE corner. • No resources released other than timing out • Salmon River Rd closed for general population. • No injuries to report • Political issues – Protection of privt land and keeping the River open to Outfitters. • BAER Team has been ordered and planning a community meeting to discuss rehab plan. • Critical needs; Additional IHC s
2 Fire: Eleven Mile IC: Riley Rose	10451 / 55% contain the rest is monitor / 298 / 8 M <ul style="list-style-type: none"> • T3 IMT in place • Rehab continues on the South, West and East • NE corner was active yesterday • Commo is back to the local Forest Net • No critical needs
3 Fire: Oak Grove IC: Eric Estep /	833 acres /10% / 150 / 1.2 M <ul style="list-style-type: none"> • North end is burning into the ledge and rock • Growth on the East and Sothern flanks • Access and terrain is difficult to put resources on the line • Shared air resources with IA yesterday - for successful IA • Municipal water shed area is threatened • FS road is closed coming into the area. Hunting season is an issue • No critical needs • Nothing to release
